

Sinus Infection Toothache Vs Regular Toothache

You are suffering from a toothache, the first thing you might want to do is to go to a dentist to have a checkup and find out what is wrong with your teeth. But in some cases, a tooth cavity, abscesses or any dental problem might not be the cause of the pain. If this is the case, then you are probably going through **sinus infection** toothache .

You are not aware, then you should know that there is a connection between the maxillary sinuses and the upper teeth. The roots of the top of teeth called maxillary molars extend to the maxillary sinuses, and so when the maxillary sinuses are infected, one of the symptoms which may always be manifested is pain in the upper teeth or what is known as sinus infection toothache. There are some cases in which a dental infection can also lead to nose related an infection as well, and due to the close relationship, that is sometimes confusing to differentiate the two conditions.

Although these conditions are sometimes confusing, there are simple steps that you can take to determine which exactly you are suffering from. You can rule out dental problems if you are already having some other **sinus infection symptoms** such as runny nose, headaches, clogged nose, post-nasal drop, a sore throat, or facial pain. If you have a history of a sinus infection, then it is possible that you are experiencing another bout and the pain in the teeth which you are feeling is actually a sinus infection toothache .

You are not confident on deciding all on your own, you can get a more reliable and accurate diagnosis by visiting your physician and let him check on your own condition. Using percussion test, your dentist can easily evaluate your teeth and be able to identify the possible dental difficulty. Pain in a single tooth may be due to a cavity or other dental problems, while annoying in all of your teeth may be an indication of a sinus infection toothache. When you are suffering from the latter condition given, then visiting a good ENT expert can help you out given that they can identify what is causing your nose connected contamination and they can give you the right course of treatment straight away.

An Ordinary Toothache Caused by a Dental Problem is Easier to Get Rid of

Compared to this kind of, a sinus infection toothache because of **sinusitis** is a lot more complicated. The bad news is that, this particular usually comes with severe discomfort and pain. However, relief is still possible as long as you are following your physician's advice and you are taking the prescribed medications punctually. Right now there can be purchased home remedies that are a good idea in relieving sinus infection toothache too. But most importantly, maintaining a great immune system is the best preventive measure you can take to avoid this kind of condition.
